

5 reasons to reset the diagnostic

We recommend re-setting the Sumdog diagnostic every 4 months, here's why:

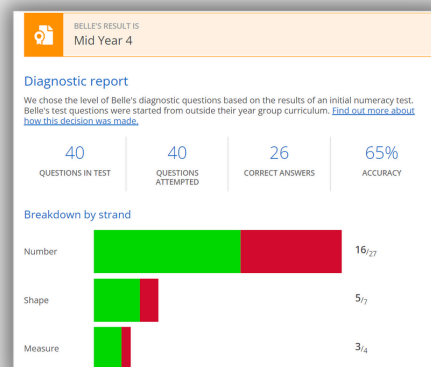

1 Using the most recent diagnostic result, identify at a glance who is on track and who needs extra support.

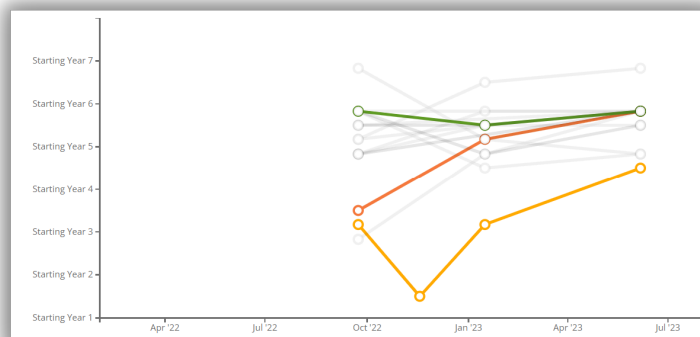

2 Identify areas of strengths and areas where more teaching or practice is needed.

DIAGNOSTIC RESULT	PRETEST SCORE	TEST SCORE	NUMBER	SHAPE	MEASURE	DATA AND PROBABILITY
MID YEAR 4 (1 DIAGNOSTIC 4.2)	10/15	26/40	16/27	5/7	3/4	1/1
MID YEAR 5 (DIAGNOSTIC 5.2)	12/15	30/40	21/28	7/8	2/3	0/1
MID YEAR 6 (DIAGNOSTIC 6.2)	15/15	40/40	28/28	8/8	3/3	1/1

3 View individual results to help pinpoint areas for intervention or provide further learning opportunities.

4 Track pupils' diagnostic results over time. We recommend resetting 3 times throughout the year to show progress.

5 Updating the diagnostic before a contest will mean your pupils will be set level-appropriate questions during the contest week.
