

5 reasons to reset the diagnostic

We recommend re-setting the Sumdog diagnostic every 4 months, here's why:

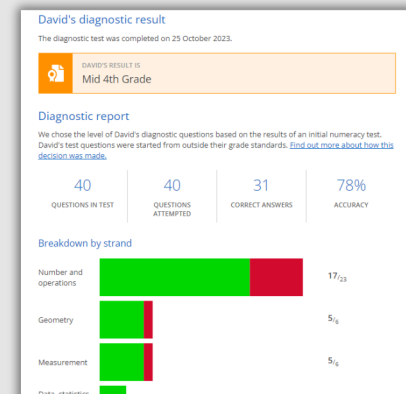

- Using the most recent diagnostic result, identify at a glance who is on track and who needs extra support.

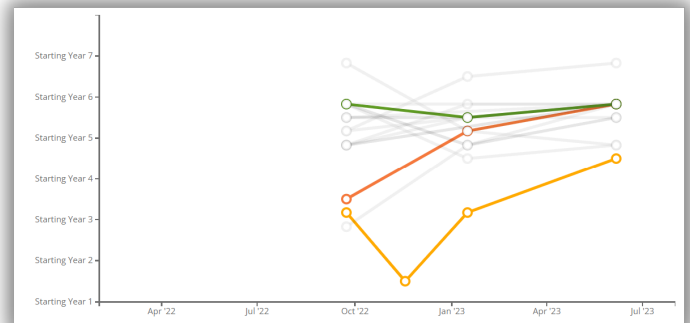

- Identify areas of strengths and areas where more teaching or practice is needed.

DIAGNOSTIC RESULT	PRETEST SCORE	TEST SCORE	NUMBER	SHARE	MEASURE	DATA AND PROBABILITY
MID YEAR 4 DIAGNOSTIC 4.1	10/15	26/40	16/27	5/7	3/4	1/1
MID YEAR 5 DIAGNOSTIC 5.1	12/15	30/40	21/28	7/8	2/3	0/1
MID YEAR 6 DIAGNOSTIC 6.1	15/15	40/40	28/28	8/8	3/3	1/1

- View individual results to help pinpoint areas for intervention or provide further learning opportunities.

- Track students' diagnostic results over time. We recommend resetting 3 times throughout the year to show progress.

- Updating the diagnostic before a contest will mean your students will be set grade-appropriate questions during the contest week.
