

Boost maths fluency throughout your local authority with Sumdog

- Set targeted, differentiated maths practice in minutes
- Identify misconceptions with ready-made informal tests
- Motivate children with multiplayer maths games
- Build confidence and reduce maths anxiety as children compete at their own level
- Inspire friendly competition and excitement with our termly contests!

What I like about Sumdog is how user friendly the interface is for teachers and pupils. Setting work is easy and saves teachers so much time as everything is auto-marked and displayed clearly for us to analyse. We've definitely seen attitudes towards maths improve since using Sumdog!

Fiona MacDonald, Acting Principal Teacher at Hallside Primary, South Lanarkshire

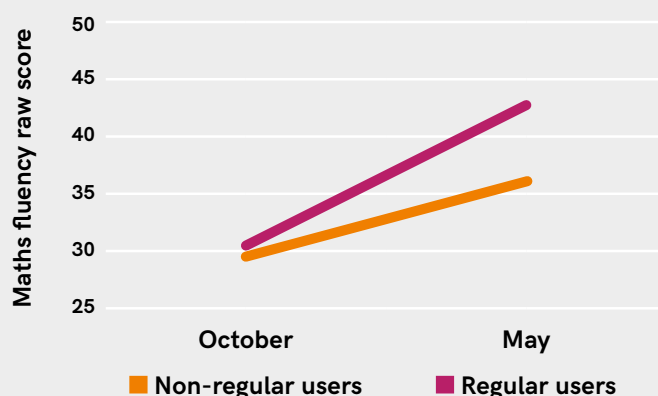

What makes Sumdog different?

- Unlike other maths practice platforms, Sumdog's games work independently from the questions. This means children can choose their favourite game, keeping them engaged and wanting to practise maths!
- The high-quality games can be used to practise any maths topic at any level. Supporting those who need extra help and challenging the more able, Sumdog's adaptivity ensures pupils are always working at the right level.
- Sumdog covers all areas of the Curriculum for Excellence and White Rose Maths scheme of learning and the updated alignment makes it even easier to set personalised practice that links directly to what you have been teaching in class.

Proven to improve fluency

Sumdog helps to accelerate pupils' progress, develop fluency and build confidence.

Using Sumdog for 30 minutes a week improves children's fluency progress at almost double the rate.

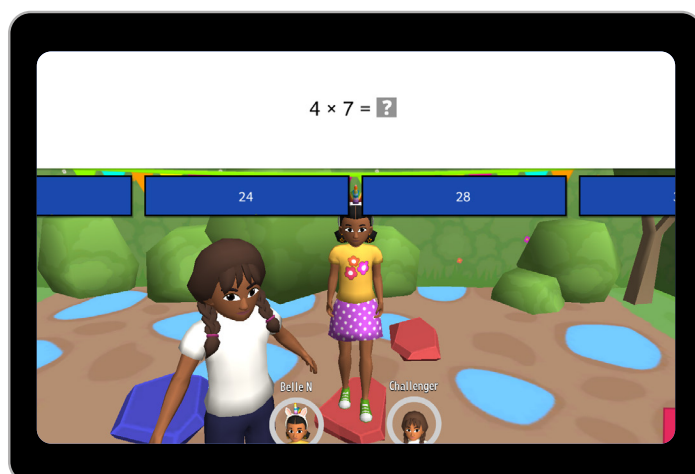

This Glasgow study was published in the *Impact Journal of the Chartered College of Teaching*. Read the full impact study at <https://bit.ly/3a7jZaO>

Engaging and motivating for children

We know that kids who enjoy their learning are more likely to practise and therefore more likely to improve. That's why we provide every child with engaging educational practice and a motivating rewards system!

- Over 35 interactive games for every learner, with new ones being added all the time
- An inclusive and personalisable avatar, featuring 24 different skin tones, religious wear, and options for children with disabilities
- Correct answers earn coins, which children can use to buy items for their house, garden, avatar, or friends

Personalised learning

Set targeted, differentiated maths practice for individuals or small groups in minutes.

The questions are written for the Curriculum for Excellence and the White Rose Maths scheme of learning, so they directly match what you've been teaching in class to support a maths mastery approach.

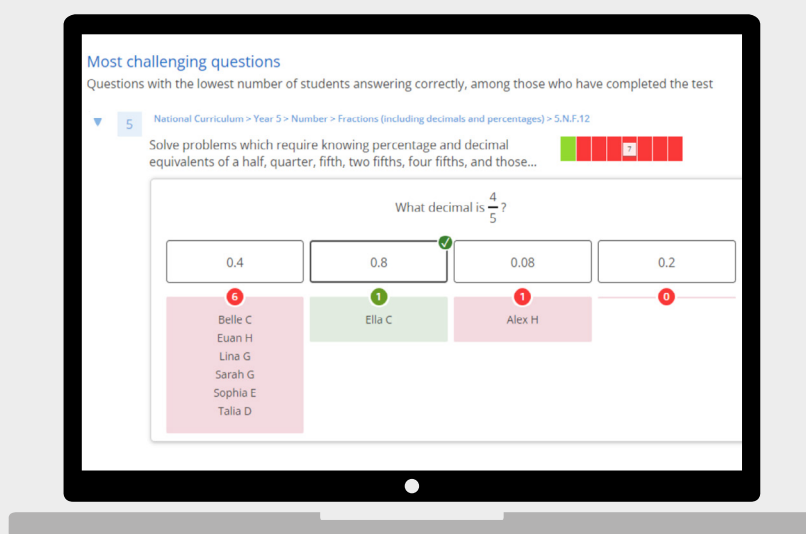

Simply select the area you've been working on and set focused, auto-marked questions. Or let Sumdog's powerful adaptive engine guide children through the topics, always ensuring they're working at the right level – you choose!

Low-stakes tests

Informal, quiz-style tests and easy-to-digest reports give you a clear picture of your class' performance.

- Pinpoint gaps in understanding with a bank of ready-made tests or create your own
- Provide a stress-free setting for children to do their best with extra rewards for effort
- View data in real-time with easy-to-digest overview reports
- Repeat tests to check progress with our new 'Change over time' feature

Building a shared vision

We know that each local authority is different and that every school has its own needs, so we work with your central team to find an offering that works for everyone. This may include:

- ▶ Special centralised discount pricing for your schools
- ▶ Support from our dedicated Data Protection Officer to assist with any specific compliance requirements you may have
- ▶ Access to our Sumdog Insights platform for central data reporting to quickly and easily see activity across your schools
- ▶ Bespoke regional contest dates, with a visit from Sumdog to celebrate the winners
- ▶ Personalised training plans for your schools, with content tailored to the individual needs of your teachers

Some of our partners

Aberdeenshire Council and Sumdog

We've worked closely with Aberdeenshire Council in a central partnership since 2023. When the Council first reached out to us, their schools were using a variety of maths resources, but they were looking for a way to unify their approach.

The partnership included centralised discounted pricing, personalised training and a bespoke data security strategy (involving the pseudonymisation of pupils' personal data).

To celebrate the new partnership, we hosted a special regional contest to unite all Aberdeenshire schools and, at the end of the contest, we visited some of the local schools to congratulate pupils for their hard work.

We have seen, first-hand, how schools are using Sumdog as one of their tools to support pupil engagement with numeracy as part of our priority in raising attainment.'

Paul Cruickshank, Quality Improvement Officer at Aberdeenshire
