

5 reasons to reset the diagnostic

We recommend re-setting the Sumdog diagnostic every 4 months, here's why:

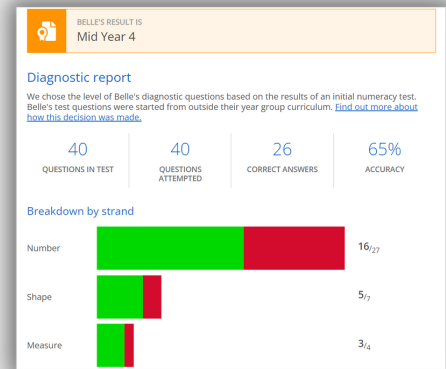

- 1 Using the most recent diagnostic result, identify at a glance who is on track and who needs extra support.

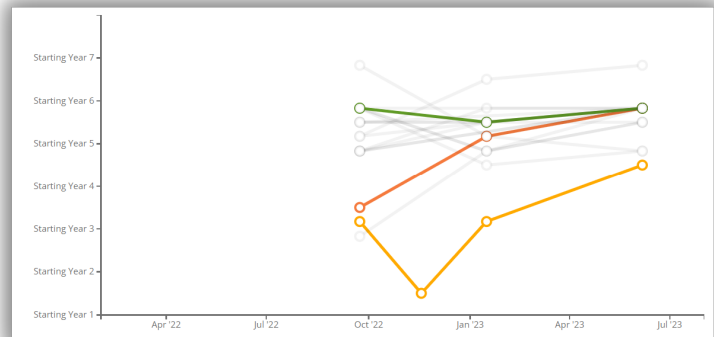

- 2 Identify areas of strengths and areas where more teaching or practice is needed.

DIAGNOSTIC RESULT	PRETEST SCORE	TEST SCORE	NUMBER	SHAPE	MEASURE	DATA HAND PROBABILITY
MID YEAR 4 DIAGNOSTIC 4.2	10/15	26/40	16/27	5/7	3/4	1/1
MID YEAR 5 DIAGNOSTIC 5.2	12/15	30/40	21/28	7/8	2/3	0/1
MID YEAR 6 DIAGNOSTIC 6.2	15/15	40/40	28/28	8/8	3/3	1/1

- 3 View individual results to help pinpoint areas for intervention or provide further learning opportunities.

- 4 Track pupils' diagnostic results over time. We recommend resetting 3 times throughout the year to show progress.

- 5 Updating the diagnostic before a contest will mean your pupils will be set level-appropriate questions during the contest week.
