

Our school is taking part in an online maths contest, hosted by Sumdog!

We'll be asking children to log in and practise maths during the contest week.

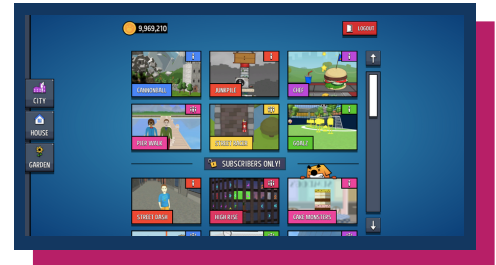

What is Sumdog?

Sumdog is an online learning tool which provides personalised maths and spelling practice that children love. It adapts questions to each child, using engaging games to build their confidence, and it's been shown to accelerate progress.

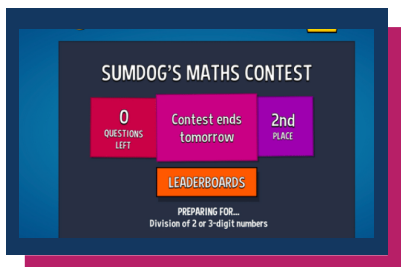

Making learning fun

Sumdog helps children to practise regularly, combining questions from the curriculum with fun games. The games are child-friendly, non violent and highly engaging - children don't even realise they're learning!

Keeping your child safe

Sumdog follows best practices in GDPR and data security, and does not support communication between pupils, so your child and their data is completely safe.

How does the contest work?

Children answer questions as accurately as they can during the contest week. The class with the highest average number of correct answers wins! There's a limit of 1,000 questions which is about one hour's worth of play and we encourage children to log in and do a little bit each day.

Parents can join in too

Keep track of what your child is learning by creating your own account where you can play the games alongside your child and encourage them along the way. Sign up for your free account at sumdog.com/parents

Get started now

Sumdog can be accessed on a computer, mobile or tablet. Go to www.sumdog.com or download the free Sumdog app which is available on Apple or Android.
