

# Build multiplication fact fluency

Let our multiplication tables tool compliment your teaching and provide new ways to practise tables with your class.

Simply select which tables you would like your class to focus on, and when you want them to practise. Pupils will then work on these tables while playing their Sumdog games.

Heat maps for accuracy and speed, plus full reporting for each pupil enable you to track fluency and identify focus areas.

## Top 4 ways to use our tables tool

- 1 Schedule a quick test at the start or end of each day
- 2 Run a refresher before teaching a topic that relies on tables
- 3 Reinforce a table you have just taught
- 4 Set homework, classwork or group work

## Why use it?

- ✓ A simple way to identify which tables pupils are confident with and where they need more practice
- ✓ Quick and easy to set up - set a times tables challenge for your class in just a few clicks
- ✓ Live data results can be downloaded and used to track individual growth over time
- ✓ Regular practice can help build multiplication fact fluency
